1. Introduction:

The improved SmartCart shopping cart module for PrestaShop allows online shop owners to present customers' shopping cart in the form of an elegant side panel, with the possibility to display the cross sells.

Customers can quickly and easily add, delete and update products in their basket, apply promo codes, and view pricing information, including basket total and delivery costs. The module also adds the option of displaying an add-to-cart bar at the bottom of the product page (ideal for mobile devices).

2. Require:

You must first have a working version of PrestaShop version 1.71.x or higher installed on your server:

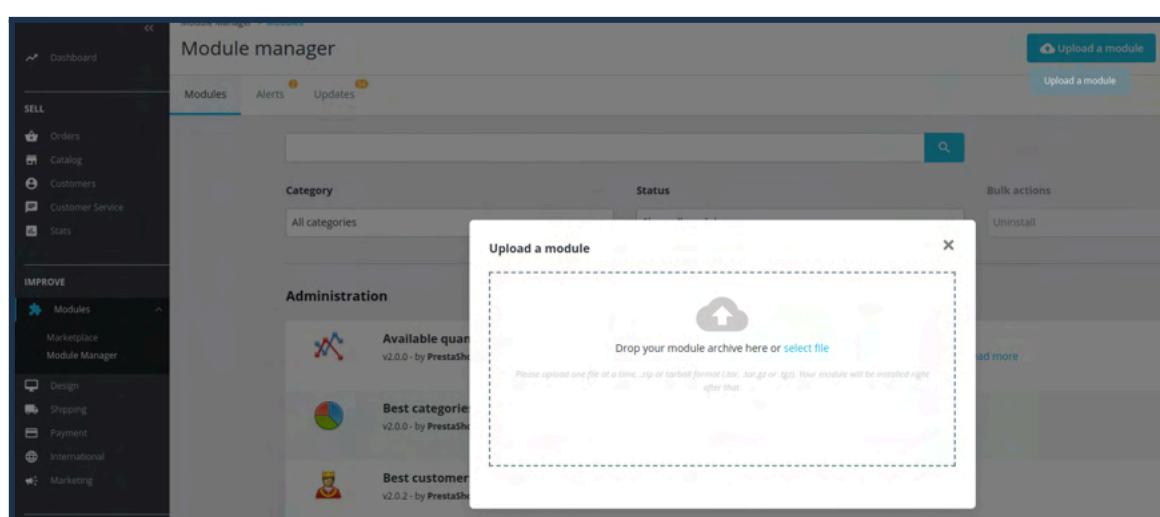

<http://www.prestashop.com/fr/telechargement>

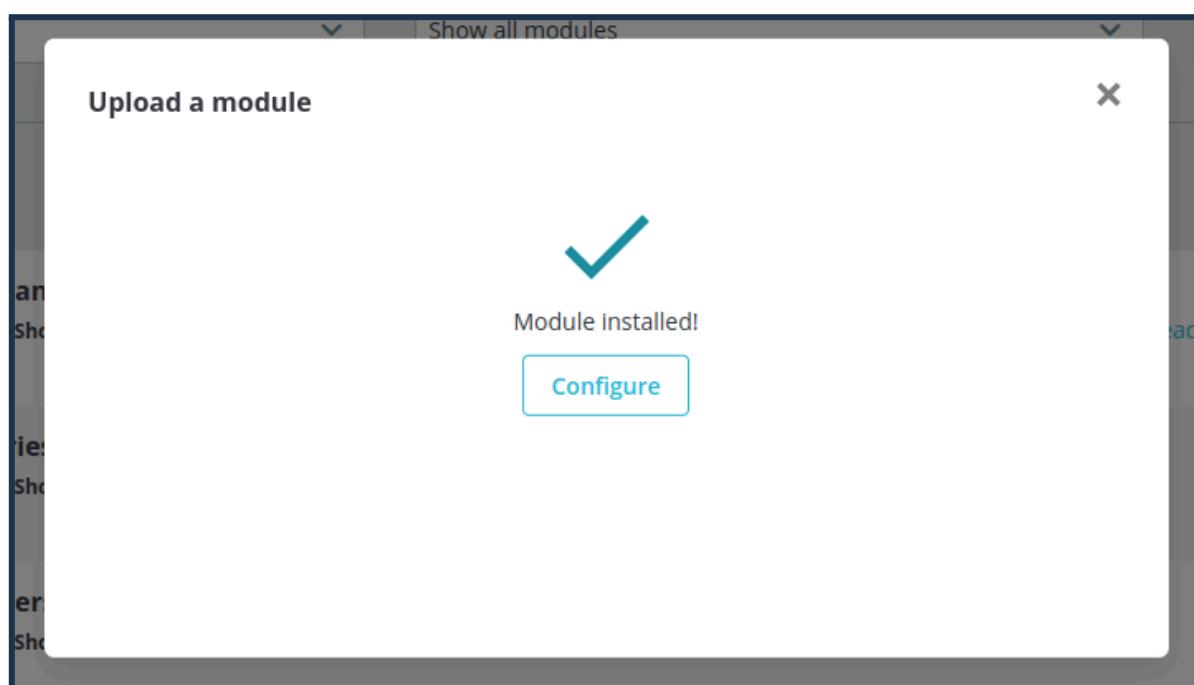

3. Installation:

The module is installed seamlessly on your store, no core file is altered or modified, allowing future continuity of store updates.

1. Once you have downloaded the archive onto your computer, go to your prestashop in the "Modules", "Module Manager" section on the left.
2. Click on the "upload a module" button at the top of your page and drag and drop your freshly downloaded archive.

3. Once this stage has been completed, your module is installed on your Prestashop. You can now move on to configuration.

4. Module Configuration:

Click directly on "configure" after installation, or go to the "Module Manager" tab seen above, search for the module you have just installed and then click on the "configure" button to the right of it.

This takes you to the module configuration page.

The configuration page is divided into 4 parts:

- Add to cart popup.
- SmartCart settings
- Tiny Toaster settings.
- Cart reminder bar settings.
- Add to cart bar settings.

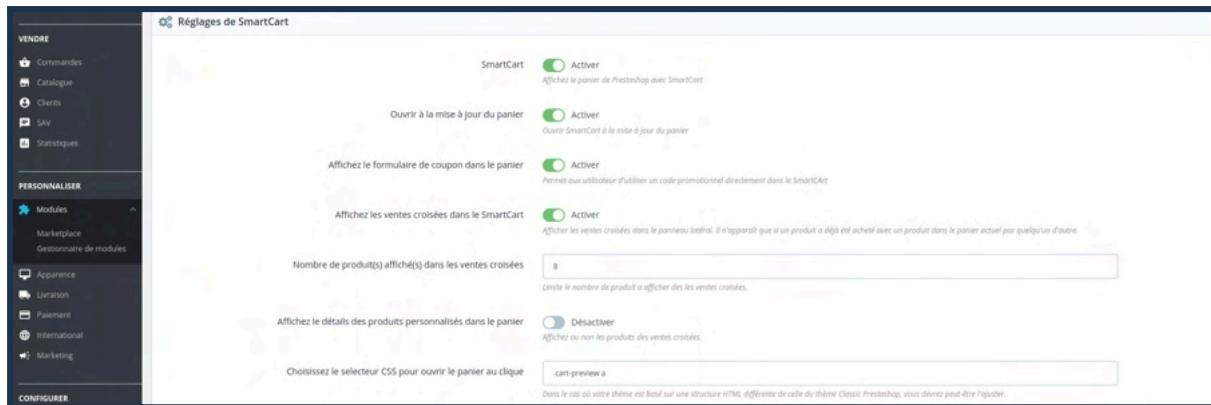

4.1. Add to cart popup.

In this section, you can make the default Prestashop add-to-cart popup visible or not.

4.2. SmartCart settings.

In this section you can :

- Make the toaster cart visible/invisible.
- Display or not the toaster when a product is added.
- Whether or not to add the section in the cart that will allow the user to add a discount coupon.
- Choose manually or attach the module by entering the selector which will open the SmartCart. By default, the fields are pre-filled by the native Prestashop selectors.
- You can customize the colors of the SmartCart in its entirety (background, text, icon, etc.).
- Add HTML content manually

4.3.Tiny Toaster settings.

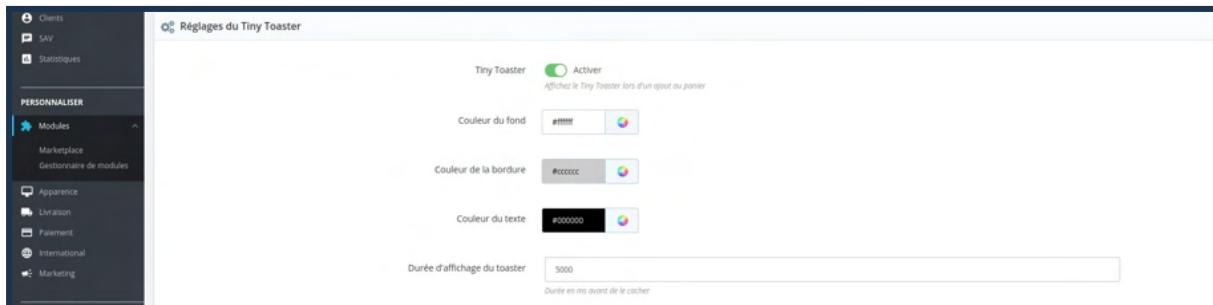

Allows management of the Tiny toaster. (Bar which appears, for a given time, after adding an item to the basket to confirm this addition).

In this section you can :

- Make the tiny toaster visible/invisible.

- You can customize the colors of the SmartCart in its entirety (background, text, border).
- Manage its display time

4.4. Cart reminder bar settings:

Allows management of the cart reminder bar. Feature that allows users to have a bar that will tell them how many items they have in their cart. This appears after a given time, at the bottom of the screen.

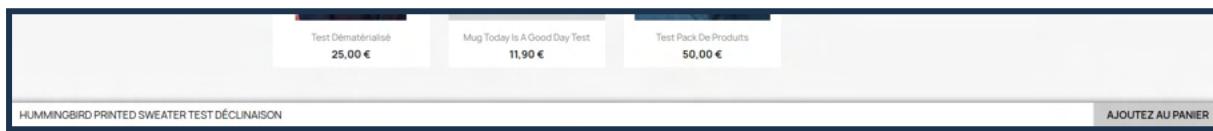

In this section you can:

- Make it visible or not.
- Customize her color (background, text, border).
- Customize its appearance time.

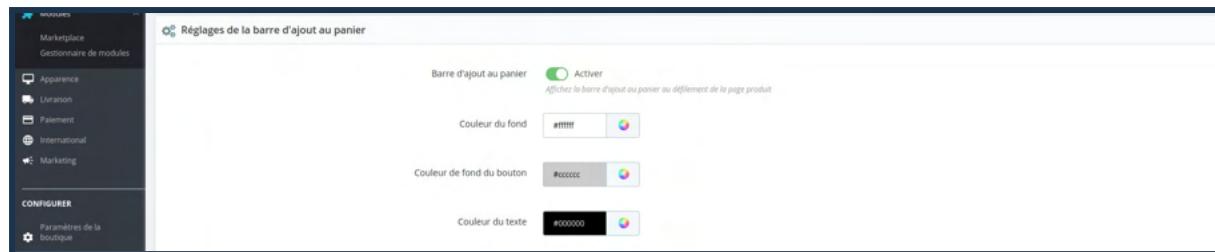

4.5. Add to cart bar settings:

Allows management of the add to cart bar. Feature that allows users who are on a product page to add the product to their cart. This feature appears after the user scrolls on the page.

In this section you can:

- Make it visible or not.
- Customize her color (background, button et text).

5. Acknowledgments and Support:

Feel free to contact us for assistance if you encounter any issues during the installation or use of the module. Our technical team is ready to assist you in any challenging situations.

If you find that our module is an excellent addition to your website, please do not hesitate to leave a review to share your experience.

We are grateful for your support and trust in our module. We hope you will fully benefit from it to enhance your e-commerce experience. Thank you for your collaboration and valuable feedback.
